By default, bookdown merges all Rmd files by the order of filenames, e.g., O1-intro.Rmd will appear before O2-literature.Rmd. Filenames that start with an underscore _ are skipped. index.Rmd will always be treated as the first file.

Stanford (2008) 英文參考文獻。中文參考文獻 (黃宣範, 1993)

Alternatively, set the order in _bookdown.yml:

rmd_files:

```
html: ["index.Rmd", "abstract.Rmd", "intro.Rmd"]
latex: ["abstract.Rmd", "intro.Rmd"]
```

Test link as note¹.

You can label chapter and section titles using {#label} after them, e.g., we can reference Chapter 1. If you do

¹http://pandoc.org/MANUAL.html#variables-for-latex

not manually label them, there will be automatic labels anyway, e.g., Chapter 3.

Figures and tables with captions will be placed in figure and table environments, respectively

```
par(mar = c(4, 4, .1, .1))
plot(pressure, type = 'b', pch = 19)
```

圖 1.1: Here is a nice figure!

Reference a figure by its code chunk label with the fig: prefix, e.g., see Figure 1.1. Similarly, you can reference tables generated from knitr::kable(), e.g., see Table 1.1.

```
knitr::kable(
  head(iris, 20), caption = 'Here is a nice table!',
  booktabs = TRUE
)
```
